

A REMARK ON *-MAXIMAL QUASI-IDEAL IN *-RING

MOIN A. ANSARI, M. RAIS KHAN AND J. P. KAUSHIK

Abstract

We have assumed that R is a $*$ -ring with unity in which every primary ideal is a $*$ -maximal quasi-ideal. In this paper we have improved the results of $*$ -rings in terms of $*$ -quasi-ideals and $*$ -maximal quasi-ideals. And have shown some characterization of $*$ -quasi-ideals in $*$ -ring.

Key Words : *Involution rings, $*$ -quasi-ideals, $*$ -maximal quasi-ideals, $*$ -bi-ideal.*
