

## **CONTINUOUS DELAY MODEL OF HEALTH SYSTEM AFFECTED BY ACUPRESSURE**

**S. H. SADATI SEYEDMAHALLEH AND M. Y. ALIKHAN**

### **Abstract**

A simple mathematical model is described in \cite which illustrates some aspects of the health process. The model is given by the following continuous differential equation:

$$\frac{dh}{dt} = h(\lambda - h)(1 - h), \quad \frac{d\lambda}{dt} = f(Q) < 0$$

It is worth noting that this model of health process is independent from the method of cure.
