

## **ON LAPLACE TRANSFORMS OF THE H-FUNCTION OF TWO VARIABLES**

**P. C. SREENIVAS**

### **Abstract**

In this paper Four Laplace transforms of the H-function of two variables with different arguments are evaluated. Laplace, Mellin, Hankel, Whittaker and Meijer's K-transforms of generalized special functions can be deduced from them. Special cases include the result proved by Gupta [1].

-----  
Key Words and Phrases : Mellin Transforms, Laplace Transforms, H-function of two variables.

2000 Mathematics Subject Classification: 45 A 05.
