Abstract

In this paper the characterization of composition and weighted composition operators of Quasi-Class Q and also some condition on weighted shift operators given. A necessary and sufficient condition for a multiplication operator $C_T M_\theta$ to be Quasi Class Q operator is investigated.

Key Words : *Hilbert Space, Class Q operators, Quasi Class Q Operators, Composition Operators, Weighted Composition, Weighted Shift Operators, Multiplication Operators.*

AMS Subject Classification : 47A20, 47A10, 47B47.
